BLF SIX MONTHS REPORT AND ARMED ACTIVITIES AGAINST PAKISTANI FORCES

Foreword

BLF is striving for a free Balochistan since its inception

The core reason for the establishment of the organization has always been to reinstate the separate Baloch identity and regain motherland's sovereignty from the occupier Pakistan.

With the founding of the organization, BLF along with armed struggle, began to create political and ideological awareness to Baloch nation and has endeavored to bring Baloch people from all walks of life together to join the armed struggle, so that the masses consciously, politically and ideologically get involved in the resistance. Because, the struggle for independence is impossible without the participation of masses.

On the fundamental principle of freedom of occupied Balochistan, BLF is educating the Baloch nation to be ideologically and politically aware. Ideologically motivated BLF fighters, along with armed resistance, expanding the struggle with political awareness across Balochistan.

Baloch nation is destroying occupying state's army and responding in a befitting manner to the parliamentary tools, death squads, religious extremists including countering the occupying state's propaganda machinery and its fake narrative.

Organization's fundamental principle is to ensure vetting and educating BLF fighters enough, so that the weapon in their hands must remain a weapon in the hands of a revolutionary and their steps may never startle defending motherland.

Today, in the length and breadth of occupied Balochistan, BLF's brave fighters are present on the ground with their revolutionary weapon in defense of their country against Pakistan's regular army and other military arms.

Certainly, fighting on various fronts at once against Pakistan army, federalists, local agents, informants, death squads, drug cartels and religious extremists is difficult. But at every given moment, BLF fighters are sacrificing their lives and vigorously leading the Baloch national struggle on the principles of the organization towards the ultimate goal.

Balochistan Liberation Front is the embodiment of its martyrs and nation's unaccounted for sacrifices and if God wills, the struggle, with the organization's principles and values, will reach the destination.

The journey is certainly long and difficult, but the destination of this revolutionary war is independent Balochistan upon which Baloch's survival and national identity depends.
